

IMPORTANT INFORMATION

GOVERNMENT GUIDELINES FOR PRIMARY SCHOOLS

With children spending almost half their childhood at school, where they are outdoors every day, during peak UV hours (11am - 3pm), government guidelines make it clear that; Schools should develop a policy on how to protect children when they are outside for more than a brief period in strong sunlight, that children should NEVER be allowed to burn and that children should be made aware of how important it is to protect their skin.

DID YOU KNOW?

- Skin cancer is the most common and fastest rising cancer in the UK
- Melanoma is now one of the biggest cancer killers in 15-30 year olds and kills more people in the UK than Australia
- Just one severe sunburn in childhood or adolescence more than doubles a persons chance of developing the disease
- Over 86% of all cases are caused by lack of protection from UV light and can be prevented by being sun safe from an early age

YOU CAN HELP!

- By educating your pupils about sun safety
- By ensuring your school is providing a sun safe environment and policy
- By showing parents your commitment to the health and wellbeing of your pupils
- By gaining your Sun Safe Schools Accreditation

We provide a comprehensive range of fun and FREE resources to help you achieve all of the above with step-by-step guidance on gaining your accreditation effectively and efficiently.
